### **DETAILED ACTION**

### , Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 116-118, 120, and 136 are rejected under 35 U.S.C. 103(a) as being unpatentable over Us 3,750,278 (hereafter Baker) in view of US 6,288,905 (hereafter Chung).

Baker discloses, referring to figures 6-13, a printed wiring board-forming sheet (29) comprising an insulating resin sheet (85) having a through hole (29a) inserted and filled with a conductive metal chip (88) of substantially the same shape as the hole, wherein the conductive metal is formed by punching a conductive metal sheet. Baker does not specifically disclose that the sheet is selected from the group consisting of a

Application/Control Number: 09/744,424

Art Unit: 2827

solder sheet, a solder–plated metal sheet and a copper alloy sheet [claim 116]. Indeed Baker discloses a preferred embodiment where the sheet is copper. However, it would have been obvious, to one having ordinary skill in the art, at the time of invention, to use a copper alloy sheet as copper alloy is know in the art to be a functional equivalent to copper in conductive applications as evidenced by Chung (see col. 3, line 65 – col. 4, line 10). Furthermore, it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416. Moreover, Applicants themselves reference this same equivalency on page 41 of the instant application.

Additionally, the modified invention of Baker discloses a conductive metal layer formed on a surface of the resin insulating sheet, the conductive material layer and the metal chip being electrically connected with each other [claim 117], wherein the conductive material layer is formed by a wiring pattern (86, 87) [claim 118], wherein the insulating sheet is formed of glass epoxy (see col. 11, lines 25-35) [claims 120, 136].

## Response to Arguments

Applicant's arguments with respect to claims 116-118, 120, and 136 have been considered but are most in view of the new ground(s) of rejection.

#### Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeremy C. Norris whose telephone number is 703-306-5737. The examiner can normally be reached on Mon.-Th., 9AM - 6:30 PM and alt. Fri. 9AM-5:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David L. Talbott can be reached on 703-305-9883. The fax phone numbers for the organization where this application or proceeding is assigned are 703-308-0725 for regular communications and 703-308-0725 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0956.
